FEATURED RELEASE

Sex, Death and the Meaning of Life

Evolutionary biologist Richard Dawkins explores what reason and science might offer to inspire and guide our lives in religion's place. Can science bring understanding in the face of death or reveal the point of life in the first place? In this thought-provoking series, he asks what happens if we leave religion behind.

NEW PROGRAMMING

The Dark Charisma of Adolf Hitler

He left behind a legacy of destruction without parallel in history. Yet there is a paradox at the heart of the story of Hitler, given his violent and hate-filled character, why did millions support him, ultimately to the destruction of their own country?

Vikings

Going on the trail of the real Vikings this series reveals an extraordinary story of a people who, from the brink of destruction, built an empire reaching around a quarter of the globe. Where did they come from? How did they really live? And what drove them to embark on such extraordinary voyages of discovery?

A Totally Different Me

At 21, Chris was a burly, rugby-playing straight man – but then an accident triggered a series of events in his brain and as he recovered a new Chris emerged. Today he still lives in the same Welsh village but is now a slim gay hairdresser interested in fashion and interior décor.

Guts

Guts uncovers the secret life of our digestive tract. Using the latest in medical imagery and a tiny camera 'pill' that Mosley swallows at the start of the film, viewers will be taken on a remarkable journey through his own internal system. At each stage medical experts explain the amazing functions that happen without our conscious effort.

Treasures of Ancient Rome

This series traces how the Romans went from being art thieves and copycats to pioneering a new artistic style. Also reveals how there was so much more to the Romans than just conquering and soldiering, and charts the decline and fall of the Roman Empire through some of its most magical artistic treasures.

Defeating the Superbugs

Our overuse of antibiotics has helped breed a dangerous collection of bacteria that have become increasingly resistant to these drugs. Horizon travels to the front line of the war against bacteria. From New Mexico to sewers of Karachi, Horizon highlights the work that hopes to stop the superbug in its tracks.
